Personenbezogene Daten: Definition

Kapitel I Artikel 4: Begriffsbestimmungen

Merkmale aus denen man eine Person **direkt** oder **indirekt** identifizieren kann

- physischen,
- physiologischen,
- genetischen,
- psychischen,
- wirtschaftlichen,
- kulturellen
- sozialen Identität oder
- Online Kennungen

Artikel 4

Begriffsbestimmungen

Im Sinne dieser Verordnung bezeichnet der Ausdruck:

1. „personenbezogene Daten“ alle Informationen, die sich auf eine identifizierte oder identifizierbare natürliche Person (im Folgenden „betroffene Person“) beziehen; als identifizierbar wird eine natürliche Person angesehen, die direkt oder indirekt, insbesondere mittels Zuordnung zu einer Kennung wie einem Namen, zu einer Kennnummer, zu Standortdaten, zu einer Online-Kennung oder zu einem oder mehreren besonderen Merkmalen, die Ausdruck der physischen, physiologischen, genetischen, psychischen, wirtschaftlichen, kulturellen oder sozialen Identität dieser natürlichen Person sind, identifiziert werden kann;

Obs	ID	Name	Firma	KSFE17_Teilnahme	Vortrag17	KSFE_Historie
1	201481102	Ulrich Reincke	SAS GmbH	1	1	16,15,14, ,12,11,10,9,8,7,6,5,4,3,2, ,0,99

Schritt 4: Absichern und Loggen

Data Quality

Lineage

Business Data Network

Federation Server

Visual Analytics

Erkennen

- Identifizieren personenbezog. Feldinhalte (DQ- Exploration und Scan)
- Inventurliste PD-kritischer Felder

Identifizieren

- Verbinden mit den Datenfluss-Metadaten zur Dokumentation der Prozesse
- Visualisierung der Lineage

Zuordnen

- Rollenbasiertes Glossar mit Verantwortlichen
- Verknüpfung fachlicher Verfahren mit technischem Data Dictionary

Absichern

- Zentrale Zugriffsbeschränkung mit dynamischen User-Rechten
- Federation
- Pseudonymisierung
- Anonymisierung
- Zugriff Logging

Überwachen

- DSB-Dashboard
- Auditing-Logs
- Monitoring
- Eskalieren und Nachhalten von Verstößen per Workflow

    or syscat.rls.member_of("Payroll", 'DEEP') as Administrator) by FEDSVR;
disconnect from FEDSVR;
quit;
```

SAS Federation Server

Scripting via Federation Server SQL Editor für Deployment / automatisierte Updates

Data Service, Catalog & Schema löschen und neu anlegen

```
drop DSN "ORCL";  
drop data service "ORCL" force;  
drop schema "Test"."Dift";  
drop catalog "Test";
```

```
CREATE DATA SERVICE ORCL TYPE ORACLE CATALOG ORCL DOMAIN OracleAuth  
{OPTIONS CONOPTS (DRIVER ORACLE, PATH ORCL), CONOPTS (DRIVER ODBC,  
ODBC_DSN Oracle)};  
CREATE CATALOG "Test" UNDER BASE {OPTIONS conopts (COMPRESS YES)};  
CREATE SCHEMA "TEST"."Dift" {OPTIONS (primarypath  
'D:\Workshop\dift\data')};
```

Zugriff für Oracle, SAS und View anlegen per Batch

The screenshot displays the SAS Federation Server Manager web interface. The top navigation bar includes the SAS logo and the text "SAS® Federation Server Manager - Home". Below this is a menu bar with "File" and "Help" options, and a "Sign Out" link in the top right corner. The main interface is divided into a left-hand navigation pane and a right-hand content area.

Left-hand navigation pane: This pane shows a hierarchical tree structure. The root node is "Federation Server gerdmp943". Under it, there are several folders: "BASE", "Financial", "pdp_de_demo", and "data". The "data" folder is currently selected and expanded, showing sub-nodes: "CRM_KUNDENBASIS", "CRM_KUNDENBASIS_PSEUDO_...", "SASDS_MDS", "SPDS_B", "SQL_LOG", and "SYSPROC".

Right-hand content area: This area displays the configuration details for the selected "data" schema. It has a tabbed interface with "Summary" and "Authorizations" tabs. The "Summary" tab is active, showing the following properties:

- Name: data
- Catalog: pdp_de_demo
- Data service: BASE
- Primary path: /data/crm/kundenbasis
- Owner: SAS ESP User

Below the properties, there is a "Properties..." button. In the top right corner of the content area, the text "Administrator: sasdemo as sasdemo" is displayed.

Angelegtes Base Schema und Federation View

The screenshot displays the SAS Federation Server Manager interface. The left sidebar shows a tree view of the Federation Server 'gerdmp943'. Under the 'BASE' schema, the 'pdp_de_demo' database is expanded, showing a 'data' schema with the 'CRM_KUNDENBASIS_PSEUDO_V_BATCH' view selected. The main pane shows the 'FEDSQL VIEW' for this view, with tabs for Summary, Query, Data, Authorizations, and Row Authorizations. The 'Query' tab is active, displaying the following SQL code:

```
CREATE VIEW "pdp_de_demo"."data"."CRM_KUNDENBASIS_PSEUDO_V_BATCH" AS
SELECT
  SYSCAT.DM.MASK (
    'ENCRYPT',
    PUT(A."KundenNr" , 8.) ,
    'ALG',
    'AES',
    'KEY',
    '12345' ) AS "KundenNr",
  SYSCAT.DM.MASK (
    'TRANC',
    A."IBAN" ,
    'FROM',
    '1234567890',
    'TO',
    'XXXXXXXXXX',
    'START',
    10 ,
    'LENGTH',
    9 ) AS IBAN_PSEUDONYMIZED,
  A."Kunde_seit" ,
  A."Geburtsdatum" ,
  A."PLZ" ,
  A."Ort" ,
  A."Bundesland" ,
  A."Steuerklasse" ,
  A."Religion" ,
  A."Letzte_Buchung" ,
  A."Saldo" ,
  A."Weitere_Einlagen" ,
```

The top of the window shows the 'SAS® Federation Server Manager - Home' title bar, a menu bar with 'File' and 'Help', and a 'Sign Out' link. The bottom right corner of the window shows the administrator 'sasdemo as sasdemo'.

Zusammenfassung

SAS Federation Server

- Integriert in die SAS Plattform
 - Deployment / automatisierte Updates per SAS Batch
 - Metadata Authentication
 - SAS WebServer
- Unterstützt die DSGVO durch folgende Funktionen:
 - Datenmaskierung (Anonymisierung und Pseudonymisierung)
 - Datenqualität Funktionen (Quality Knowledge Base)
- Zentrale Administration / Zugriff auf die Daten
 - durch Virtualisierung über Datenbanken hinweg
 - Logging der Zugriffe (Nachvollziehbarkeit)
