

Plattform Netzwerktreffen

SAS Professional Services im Jahr 2021 Status, Schwerpunkte, Trends

Thorsten Hagenberger, Director Professional Services

25. März 2021

Agenda

- Status
- Schwerpunkte in der SAS Plattform in 2021
 - Viya 4 Quickstart
 - SAS® Cloud Assessment Service
 - SAS Application Management (SAM)

Status

Status

- Auch in der Pandemie sind Services der am stärksten wachsende Bereich bei SAS.
- Unsere Kunden haben durch ihre Flexibilität und Agilität ermöglicht, dass wir alle unsere Projekte fast reibungslos fortführen konnten.

Vielen
Dank!!!

Status

(Auch) durch die Pandemie sind verschiedene Themen in den Fokus gerückt:

- Optimierung
- Prognose
- Digitalisierung
- Automatisierung
- Cloud
- Risikomanagement
- Geändertes Kaufverhalten
- Personalisierte Kundenansprache

SAS delivers IMPACT, not SW only.

1

We help our clients to **Identify** their possibilities in Digital Transformation, to **Map** these opportunities out and **Prove** their value.

2

Our consultants **Act** based on world-class software technologies. We **Connect** the dots and help to **Transform** the clients organisation.

SAS Institute

What do we mean, when we talk about IMPACT?

- Business Process Support
- Workforce Transformation
- Analytical Coaching and Performance Optimization

- Frontend & Process Development
- Premium Technical Support
- Remote Managed Cloud Services
- Education & Training

- Installation, Migration & Administration
- Architecture Advisory
- Solution Implementation & Model Development

- Prove of Value: Setup
- Prove of Value: Execution
- Prove of Value: Delivery & Interpretation

- Data Science Maturity Evaluation
- Analytics Strategy Design
- Architecture & Cloud Strategy
- Solution Design

- Business Process Assessment
- Co-Innovation & Design Thinking
- Analytics Use Case Lab

SAS® Viya® Quickstart

Your path to innovation

SAS® VIYA® Quickstart – two deployment scenarios

Microsoft Azure Cloud
Customer-Owned

sas viya

SAS® Cloud
Hosted Managed Services

SAS[®] Viya[®] Quickstart

Microsoft Azure Cloud Offering

Microsoft Azure – Deployment

Option 1: Create New Azure Kubernetes Cluster and Deploy With Terraform

5 md (Quickstart Proposal)

Order SAS Viya

Place order at SAS,
receive license data

Deploy Azure Kubernetes Service

Utilize Terraform to create a new
Azure Kubernetes Service

Deploy SAS Viya

Execute deployment scripts

Choose Azure subscription

Use an existing or create a new,
depending on requirements

Prepare deployment

Create SAS Viya repository mirror and
customize deployment scripts

Finalize

Post-Deployment
configuration

Microsoft Azure – Deployment

Option 2: Use Existing Azure Kubernetes Cluster or Deploy Without Terraform

6-x md (Scope needs to be clarified, not part of quickstart proposal)

Order SAS Viya

Place order at SAS,
receive license data

Configure Azure Kubernetes Service

Walk through official Terraform
template and create needed
resources

Deploy SAS Viya

Execute deployment scripts

Choose Azure subscription

Use an existing or create a new,
depending on requirements

Prepare deployment

Create SAS Viya repository mirror and
customize deployment scripts

Finalize

Post-Deployment
configuration

SAS® Viya® Quickstart

Microsoft Azure Cloud Offering – key deliverables

Consulting			Education/Training
			
Kick-off/Service Definition Workshop 2-man days incl. preparation and documentation	Azure Deployment Support 5-man days incl. system hand-over	Mentoring / Implementation Support 15-man days customer support on-demand	Education Packages based on individual selection

*) If included in SAS Viya license

sas viya

SAS[®] Viya[®] Quickstart
SAS[®] Cloud Offering

SAS Cloud on Azure

The **SAS Cloud** delivers the value of analytics software in a **SAS-managed environment on Azure**.

SAS Cloud helps organizations **deliver value and agility** in the fastest time possible and **meet your changing business demands**.

SAS Cloud enables customers to maximize the return on investment in SAS software, **by trusting the install, configuration and management to SAS**.

Experience the piece of mind from knowing it's **all running on the Azure cloud**.

SAS® Viya® Quickstart

SAS® Cloud Offering – key deliverables

Consulting

Kick-off/Service Definition Workshop
5-man days incl. preparation and documentation

- Overview of SAS® Viya® – how it's different from existing
- Definition of needed architecture and enterprise integration incl. documentation
- Aid in delivering inputs required by SAS® Cloud
- Project Planning

Mentoring / Implementation Support
15-man days
customer support on-demand

- Contains support for 3 analysis, reports or graphs with SAS® Visual Analytics
- Contains support for 1 Use Case - Machine Learning - (Problem definition, Pre-processing, Modelling) *

**) If included in SAS Viya license*

Education/Training

Education Packages
based on individual selection

- Free Video Library / Online
- Administration Training
- SAS® Visual Analytics Basic Training

SAS® Hosted Managed Services (HMS)

- Deployment and administration of the infrastructure
- Installation and configuration of SAS Viya
- Ongoing SAS Administrator tasks

Offering Comparison

We Need (the customer perspective)

Own supervision of our cloud landscape.

SAS provided infrastructure and hosting.

SAS provided technical management of our platform.

SAS provided functional application management.

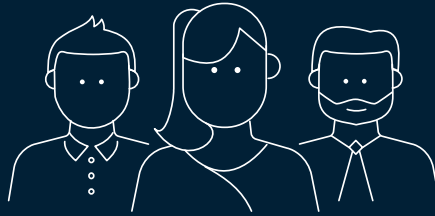

Microsoft Azure +
SAS Application Management

SAS Cloud
Hosted Managed Services

SAS[®] Viya[®]

SAS[®] Viya[®] Quickstart – Additional Support

Additional Consulting Support

Beyond of the included service packages and initial configuration of **SAS® Viya® platform**, **SAS Professional Services** provides additional support in terms of analytical lifecycle, platform implementation and integration of **SAS® Viya®** into existing enterprise infrastructure.

Following support tasks as an example:

- Starting and implementing of analytical projects
 - Data integration / linking of additional data sources
 - Implementation of business use cases
 - Implementation of analytical models
 - Enhancement of security concept, add further user
 - Data loading (ETL)
 - Review of existing (ETL-) processes
- Integration of **SAS® Viya®** into existing infrastructure
- Productive usage of **SAS® Viya®**

SAS® Cloud Assessment Service

Delivered by SAS Professional Services DACH

Covered Scenarios

Lift & Shift

Migrate your existing installation to the cloud with minimal changes

Update

Migrate to the cloud and apply latest release updates
(SAS 9.4 Maintenance Release or SAS Viya 3.5 Update)

Upgrade

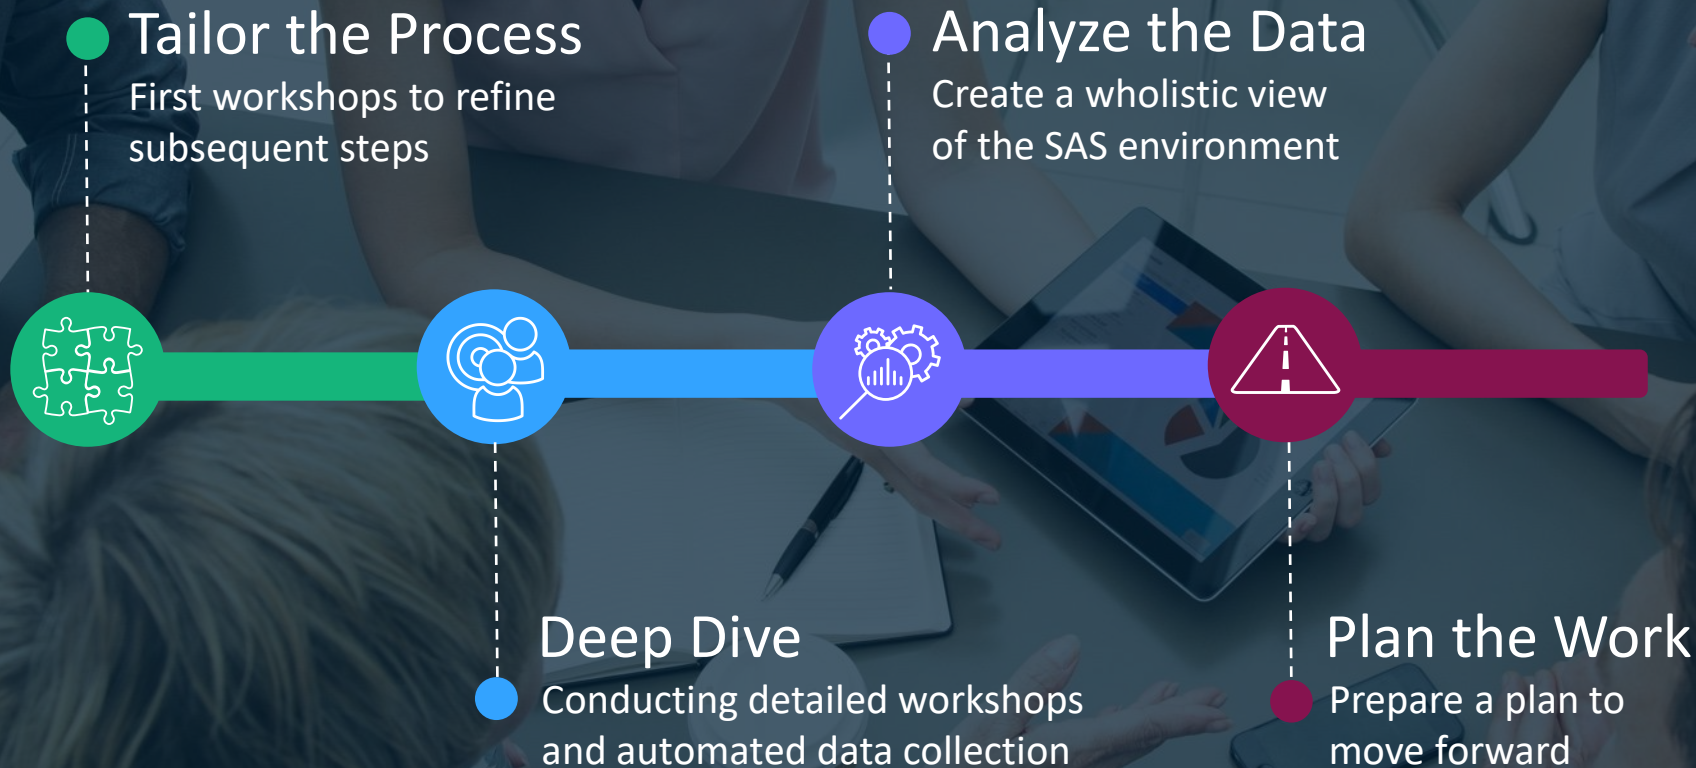

Migrate to the newest release within the SAS major version
(SAS 9.x → 9.4 or SAS Viya 3.x → 3.5) or change in software license

Modernization

Modernize your SAS 9 release to SAS Viya (3.5 or 2020)
or your SAS Viya 3.5 release to SAS Viya 2020

The SAS® Cloud Assessment Service Process

Tailor the Process

From a **set of tools and techniques** that SAS Professional Services can utilize throughout the assessment process, the **relevant ones need to be selected**.

Initial workshops with the customer will provide the necessary insights to **tailor the process to the customer's needs**.

Deep Dive

The assessment process requires **deep knowledge of the customer's environment** and their **motivation**.

SAS works closely with the customer in **workshops and one to one meetings** at the desk. Management, business users and IT personnel will be heard.

Customized **automated analysis tools** will provide additional information.

Analyze the Data

SAS creates a **wholistic view** of the customer's SAS environment from all the **information collected** during the deep dive.

Therefore, we will **not be limited to pure technical aspects**. **Financial and strategic factors** will shape the analysis.

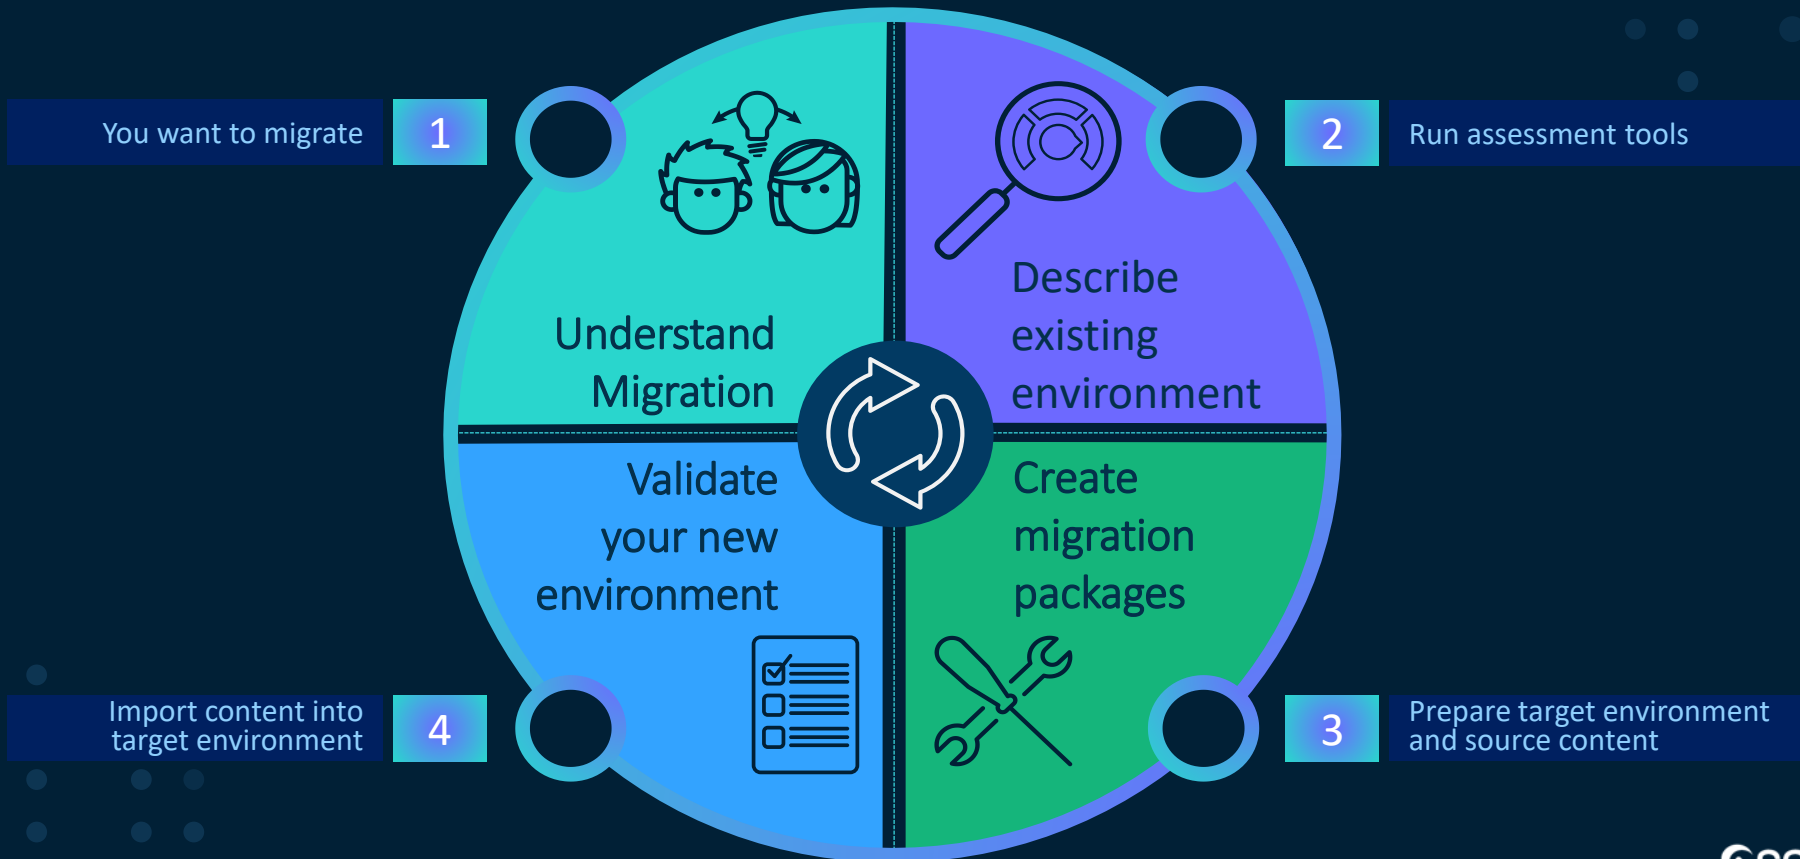

Plan the Work

SAS designs a **migration roadmap** for the customer.

The **results of the analysis** will be critically scrutinized and **mapped** to the **customer vision**.

As **hidden details** might be revealed, the advice SAS gives could **open a new perspective**.

Roadmap: High-Level Migration Workflow

SAS Application Management (SAM)

Specialized support for managing your SAS® environment(s)

SAS Application Management (SAM)

SAS Managed Services Team

- Technical Application Management
- Functional Application Management
- Premium Technical Support

(Remote) Managed Services

- Business Layer
- Application Layer
- Hardware Layer (Hosting)

Dedicated Team (EU):

- Part of SAS Technology Practice
- 14 consultants in DE, NL, BE and POR
- Technical Engineers
- Functional Consultants

On-call consultancy (8h-18h)

Service Level Agreement model

Technical Application Management

Managing the technical state of deployed software and application services.

General

- Focuses on the technical aspects of your SAS environment(s).
- SAS Administrator
- Follows best practices such as ITIL
- Backed by a profound SAS knowledge
- Adopts a Proactive Approach
- Stable, Secure & Up-to-Date SAS environment(s)

Technical Application Management

Managing the technical state of deployed software and application services.

Tasks

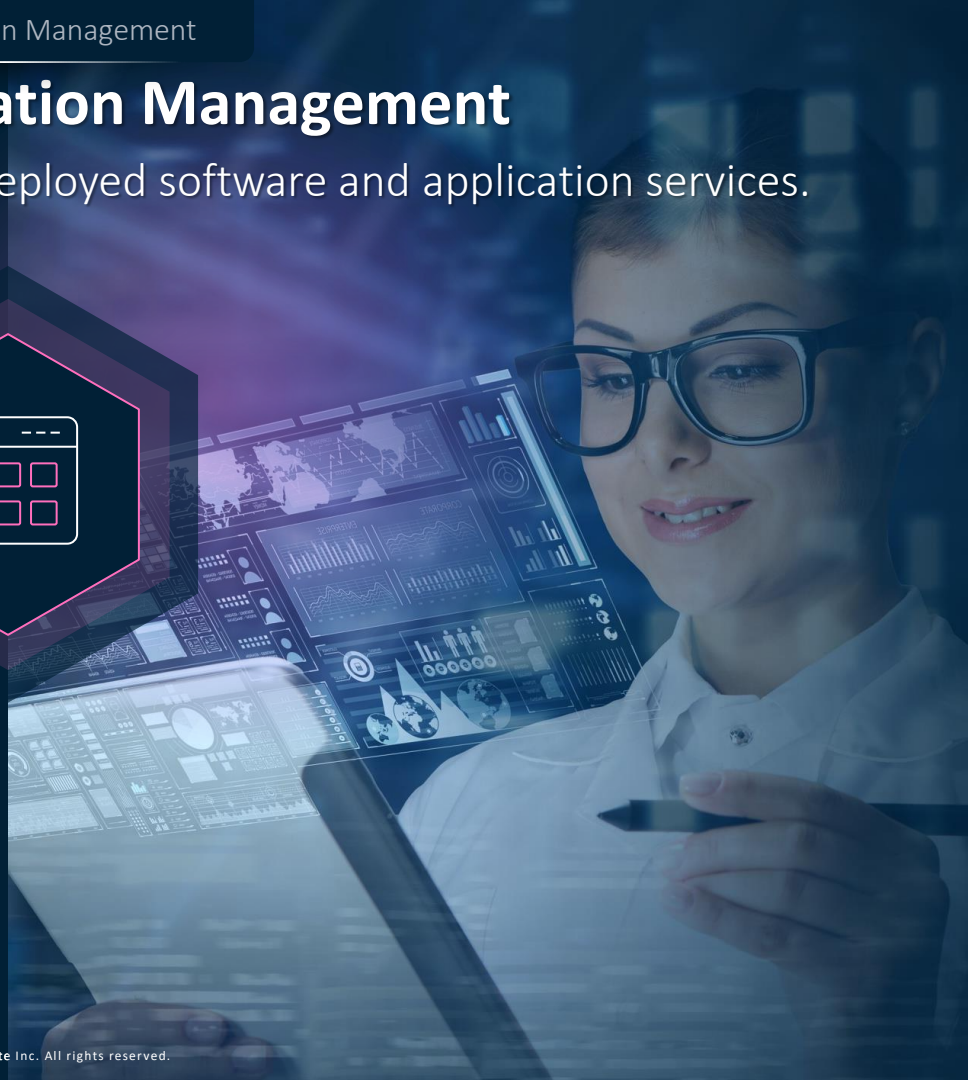

- Monitoring of application health
- Facilitating back-up and restore procedures
- Hotfix & patch management
- Incident Management
- Update system configuration
- Log analysis
- Manage security settings
- Housekeeping
- License & Certificate management
- Service Governance
- ... and Information requests

Functional Application Management

Managing the functional aspects of the deployed software and application services.

General

- Focuses on the Functional aspects of your SAS environment(s)
- SAS knowledge
 - Data Management
 - Visual Analytics
 - Risk Management
- Maintaining “Work Products”
- Ensure continuity and stability “Productionalized” content
- Services within the solution via DevOps
- Business support

Functional Application Management

Managing the technical state of deployed software and application services.

Tasks

- 
- 
- Ensure successful execution of Batch processing
 - Govern the delivery of analytical output
 - Facilitating in new content releases
 - User story development within the solution
 - Monitoring and correction
 - Validation of information delivery
 - Service Governance
 - And... Information requests

A series of horizontal bars of varying lengths and colors (teal, blue, and dark blue) are positioned on the left side of the slide, creating a modern, abstract background element.
