Impact Analysis – Transparenz für die Datenflüsse

The screenshot displays the SAS Impact Analysis interface. On the left, the 'Library Connections' pane shows a tree view with 'AVODATA1.CARS' selected. A context menu is open over 'CARS', with 'View impact analysis' highlighted. The main pane shows the 'Impact Analysis (CARS)' window with the 'Origin' tab selected. It displays a table of data flows with columns: Name, Changed, Data Path, and Step Type.

Name	Changed	Data Path	Step Type
CARS.Origin			--
> calculate_avg_car_price_per_origin...			--
> cars_prices_load.flw			--
> load_cars_datamart.flw			--
Drop columns.Origin			Manage Columns
Select expensive cars.Origin			Filter Rows
Sort By Price.Origin			Sort
Load Cars Datamart Table.Origin			Load Table
> CARS_DATAMART.Origin			Column
> process_cars.flw			--
